

Hackathon

Hackathon is a problem solving event. Individuals and teams get together with a common purpose - to solve a problem they feel passionate about. It's all about combining practical and creative innovation that supports the idea of learning while doing.

YouthBank non subscribers: €60 per team

YouthBank subscribers: FREE

The Challenge

Creating sustainable youth funds in local communities

Note: Topic for the second hackathon (June 2023) will be defined by the young people during the first hackathon in April.

Our hackathons are a 2.5 day, intensive, interactive and highly participatory event during which participants go through the process that consists of short knowledge inputs (entrepreneurship workshops), team mentoring sessions and self-paced team work.

By the end of the hackathon we will have 3 teams that successfully managed to overcome the challenge and will be rewarded with cash prizes to support their future team's work.

The hackathon will be available to all the young people from the YouthBank International Network as well as to other organisations familiar with the model.

Through Youth Bank International activities and services, we support young people through structured peer learning with a strong emphasis on decision making.

Purpose of the hackathon

To gather the young people from different cultural backgrounds and contexts and have them work on the same challenge

To share the elements of entrepreneurship among young people

To expand their understanding of solutions and simplicity in creativity and overall understanding of financial literacy

To build young people with experience that will result in self worth

To challenge young people with the power of decision making that`s placed in their hands

Prizes

1st Place Prize: 2.500 € per team

2nd Place Prize: 1.500 € per team

3rd Place Prize: 1.000 € per team

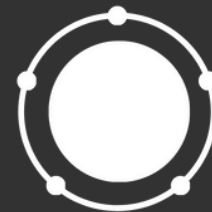

All the prizes are to be shared among the team members.

Time zone on the schedule is CET
